PD Perfect Durability Needles:

Lasts Five Times Longer Than Chrome-Plated Needles

Productivity of automated sewing equipment is limited by the life of their needles. PD titanium coated needles are significantly stronger than other needles while maintaining elasticity. This reduces needle breakage, bending and distortion. PD needles are more wear resistant than conventional chromium plated needles. PD needles provide perfect reliability and durability in prolonged stitching operations.

Stronger at the Point of the Needle

Organ's process for making PD needles also strengthens the point of the needle. The point of a needle is exposed to high pressures causing needle wear and breakage. The strength of the needle has been reinforced while maintaining a perfect shape in order to provide greater wear resistance and durability.

Test of Wear with a Chrome Plated Needle
